I'm currently nearing graduation and expect to graduate in early 2025.

## Skills

HTML and CSS  
JavaScript, React.js and Vue.js  
C# and .NET  
PHP  
Java  
SQL (Microsoft SQL, MySQL)  
NoSQL (MongoDB)  
WordPress  
GitHub (Version control and code repository management)  
Trello (Project management and task tracking)

## Languages

### **Albanian**

*Native*

### **English**

*Intermediate*

## My Projects

**Wellness360:** A web application in which the user registers and monitors the activities they have done and the foods they have eaten over time.

**Client-Side (Frontend):** ReactJS

**Server-Side (Backend):** ASP.NET Core Web API

**Database:** MongoDB & Microsoft Sql Server

**Repository link:** <https://github.com/lkadriu/Wellness360>

**Restaurant Website:** I developed a restaurant website using just HTML, CSS, and JavaScript. This website consists of three main pages: Home, Gallery, and Contact Us.

**See Live:** <https://visionary-platypus-2d7fd5.netlify.app/>

**Repository link:** <https://github.com/lkadriu/Restaurant-Website>

**TempTrack:** A web application that provides real-time weather information for specific locations. Users can enter a city to get weather forecasts and conditions.

**Frontend:** HTML, CSS and Javascript

**Server-Side (Backend):** ASP.NET Core MVC

**Database:** Microsoft Sql Server

**Repository link:** <https://github.com/lkadriu/TempTrack>

**QuickBuy:** I developed an eCommerce website using **WordPress**. The site features a user-friendly interface that enhances the shopping experience for customers. Some of the plugins that i used to optimize functionality: *WooCommerce*, *Elementor*, *Akismet Anti-Spam* etc.

**PFM - Personal Finance Manager:** Currently working on this project, which helps users track their expenses and manage their finances more easily

The project is being developed using **Vue.js** for the frontend, **PHP** for the backend, and **MySQL** as the database.
